Profile

I am a Computer Science undergraduate at the University of Sri Jayewardenepura with a strong interest in software engineering and full-stack development. I have hands-on experience with technologies such as Java, Python, JavaScript, React, Spring Boot, Docker, and Git. I am passionate about learning new technologies, solving real-world problems through software, and developing reliable, user-focused applications.

Education

University of Sri Jayewardenepura <i>Bachelor of Science (Honours) in Computer Science Current Overall GPA: 3.55/4.0</i>	May 2023 - Present Nugegoda, Sri Lanka
IDM Nations Campus <i>International Higher Diploma in Computing Overall GPA: 3.6/4.0</i>	Mar 2022 - Nov 2024 Colombo 04, Sri Lanka
Royal College <i>G.C.E. Advanced Level (Physical Science Stream) Z-Score: 1.3870</i>	2009 - 2021 Colombo 07, Sri Lanka

Technical Skills

Programming Languages: C, C#, C++, PHP, Java, Python
Web Technologies: HTML, CSS, JavaScript
Libraries and Frameworks: React, Angular, Bootstrap, Express.js, Flask, NumPy, OpenCV, Spring Boot
Databases: MySQL, SQLite, MongoDB
Developer Tools: Git / Github, Docker, Postman, Jenkins
Operating Systems: Windows, Linux

Projects

Doctor Queue & Lab Report Tracker <i>Technologies: React, Spring Boot, MySQL, Docker, Jenkins</i> - Designed and developed a web application to modernize Sri Lankan government hospital workflows through real-time doctor queue tracking and lab report monitoring. - Implemented role-based access control across custom dashboards, enabling patients to monitor queue positions remotely while staff update statuses live. - Architected independent backend microservices using Spring Boot and containerized the full stack with Docker to establish automated CI/CD deployment via Jenkins.	GitHub Repository
Music-Responsive Dancing Robot Trio <i>Technologies: Python, Keras, TensorFlow, librosa, PyAudio, Flask, C++, ESP32, Arduino, HTML/CSS/JS</i> - Led the development of an AI-powered robotic system that classifies music into 10 genres in real time and generates genre-aware dance movements for multiple ESP32-based robots. - Built a real-time audio processing pipeline using Librosa and PyAudio to extract acoustic features, enabling dynamic movement adaptation based on tempo, energy, and spectral characteristics. - Implemented wireless UDP communication and PWM motor control for synchronized robot movements, supporting three robots. - Developed a Flask-based web interface for audio source selection, robot management, real-time status monitoring, and dance control, with synchronized WS2812B LED visual feedback.	GitHub Repository
Online Fashion Store Management System (Vogue Vista) <i>Technologies: HTML, CSS, JavaScript, PHP, MySQL, XAMPP</i> Designed and implemented the frontend and backend for the Home, Login, and Register pages, including responsive navigation bars and footers.	GitHub Repository

- Led group task distribution and managed team code integrations by reviewing and merging pull requests on GitHub.
- Collaborated on backend feature development for key user flows, including Checkout, Shopping Cart, Wishlist, Main Item display, and Contact Us forms.

Restaurant Table Reservation System (XYZ Restaurant)

[GitHub Repository](#)

Technologies: Java, Java Swing, SQLite

- Developed a desktop-based reservation application using Java Swing and SQLite database, supporting flexible booking modes such as single-day, multi-day ranges, and recurring weekly schedules.
- Implemented role-based access control separating Admin and Customer interfaces, enabling administrative CRUD operations for tables, bookings, customers, and system users.
- Designed a normalized relational database schema featuring automated availability verification and real-time form validations..

Hotel Management System (Hotel Dynamic)

[GitHub Repository](#)

Technologies: C#, MS Access, Crystal Reports

- Developed a desktop management application featuring dual-role administration, guest check-in/check-out processing, dynamic pricing calculation, and room inventory tracking.
- Integrated MS Access database operations to perform real-time data persistence and CRUD functionality across admins, guests, rooms, and reservations.
- Implemented custom Crystal Reports modules to generate actionable analytics and downloadable operational reports for hotel management decision-making.

Extracurricular Activities

- **Director of Public Relations – Computer Science Association, University of Sri Jayewardenepura:** Managing public relations, communications, and promotional activities of the association.
- **Committee Member – AURORA 2024, Conference on Computer Science:** Contributed to the planning and execution of event decorations as a member of the Decoration Committee.
- **Senior Member – AURORA 2026, Conference on Computer Science:** Overlooked the Event Management Committee and supported the planning, coordination, and execution of the conference.
